BEFORE COMPLETING THIS FORM PLEASE READ THE FOLLOWING POINTS VERY CAREFULLY

1. The blue section on the form is optional. All other areas **MUST** be completed.
2. All kittens must be registered with-in nine (9) months of date of birth.
3. All surviving progeny in a litter **MUST** be registered.
 - a) All kittens for breeding must be registered as “entire” and can only be registered in the new owner’s name if the new owner holds a breeding prefix. The breeder can request to have “*Not to be transferred again entire*” on the certificate of registration – **Important note** - if this is added to the registration, it cannot be removed until the cat has been desexed.
 - b) All other kittens must be registered as either “desexed” or “to be desexed”. ***Kittens can only be registered as desexed if this procedure has been carried out prior to registration.***
The breeder can also request to have “*pet only*” on the certificate of registration.
Please tick relevant box if these restrictions are required.
4. The breeder must be the registered owner or lessee of the dam at the time of birth of the kittens, and the dam must be registered with QFA Inc.
5. If the sire is owned by the breeder, he must be registered with QFA Inc.
6. Where the sire is not owned by the breeder or registered with QFA Inc. a copy of his certified registration/pedigree is required. The stud owner must fully complete and sign the stud service section on the form.
7. The breeder is required to register and name litter kittens either in the name of the breeder or directly into the name of the new owner
8. A cat’s name must not include punctuations (eg, hyphens -, questions marks ?, quotation marks “ etc) or ordinal numbers. Apostrophes are allowed.
9. Kitten names cannot be longer than 30 letters including prefix and spaces.
10. DNA results for inheritable disorders, blood group, colour, agouti, points and longhair carriers, etc. maybe recorded on pedigrees. Breeders can submit their own test to the laboratory but **MUST** include the microchip number of the cat on the laboratory form. The results can be recorded on the Certificate of Registration and Pedigree.
