DATE OF TRANSFER: _____		Suburb:		State:	Postcode:	Office Use	
PAYMENT AMOUNT ENCLOSED OR TRANSFERRED: \$ _____		Suburb:		State:	Postcode:	Office Use	

**BEFORE COMPLETING THIS FORM PLEASE READ THE FOLLOWING POINTS VERY CAREFULLY**

1. The blue section on the form is optional. All other areas **MUST** be completed.
2. All kittens must be registered with-in nine (9) months of date of birth.
3. All surviving progeny in a litter **MUST** be registered.
  - a) All kittens for breeding must be registered as “**entire**” and can only be registered in the new owner’s name if the new owner holds a breeding prefix. The breeder can request to have “*Not to be transferred again entire*” on the certificate of registration – **Important note** - if this is added to the registration, it cannot be removed until the cat has been desexed.
  - b) All other kittens must be registered as “**desexed**” and must have accompanying desexing certificate submitted prior to registrations being processed. ***Kittens will only be registered with accompanying vet signed desexing certificate for each kitten or litter.***  
The breeder can also request to have “*pet only*” on the certificate of registration.  
**Please tick relevant box if these restrictions are required.**
4. The breeder must be the registered owner or lessee of the dam at the time of birth of the kittens, and the dam must be registered with QFA Inc.
5. If the sire is owned by the breeder, he must be registered with QFA Inc.
6. Where the sire is not owned by the breeder or registered with QFA Inc. a copy of his certified registration/pedigree is required. The stud owner must fully complete and sign the stud service section on the form.
7. The breeder is required to register and name litter kittens either in the name of the breeder or directly into the name of the new owner
8. A cat’s name must not include punctuations (eg, hyphens -, questions marks ?, quotation marks “ etc) or ordinal numbers. Apostrophes are allowed.
9. Kitten names cannot be longer than 30 letters including prefix and spaces.
10. DNA results for inheritable disorders, blood group, colour, agouti, points and longhair carriers etc. may only be recorded on Certificate of Registration and Pedigree when the swab sample is taken and submitted by a Veterinarian who must scan and record the microchip number on the laboratory form . Once the result is received back from the Laboratory, if it is CLEAR, it can be forwarded to the Registrar and added onto the Certificate of Registration and Pedigree. This will only be included on the Certificate of Registration and Pedigree of the cat that was tested. (It will not carry through to the Certificate of Registration and Pedigree of any progeny). DNA result that does not conclusively rule out the cat ever developing a genetic disease will not be recorded on the Certificate of Registration & Pedigree.
